

Healing Night - Wed 30th June 7:30pm

Does prayer have the power to change your circumstances?

Shane's Story - In 1991 Shane was a young soldier in the Regular Army preparing to join the SAS when he injured his back. At first they couldn't find the problem although he continued to suffer constant acute back pain. Then as part of his final medical before being discharged in 2000, they performed a CT scan. Shane continues...

"Within 24hrs of the CT scan the specialist called me to arrange an urgent meeting. CT scans had shown that two of the intervertebral discs in my lower back were desiccated (dry and breaking apart) and that I had swelling around my sciatic nerves causing referred pain to my legs. Diagnosis was that I would be in a wheel chair within 10 years... Within 2 years I was heavily dependent on "Trimadol", an opiate derivative, for pain relief. Anti inflammatory and valium to help with rest. For the past 9 years I have had constant 'pins and needles' in my feet, acute pain down the back of my legs, suffered severe restless leg syndrome, and sharp pain in my lower back without relief. Side effects have included weekly migraine headaches, insomnia and periods of incapacity.

On Sunday the 28 March 2010, (more than 10 years since my diagnosis) I received prayer at Impact Ministries... At the time I was under the influence of my pain medication, however I did notice instantly that the pins and needles were gone and a cold feeling across my lower back. Since that day I have taken NO medication, I have had NO physical symptoms of my condition. Diagnosis - healed!"

Venue: St Matthews Community Church, 101 Matthew Flinders Avenue Endeavour Hills (Mel:91 D5), Enter via Daniel Solander Drive)
Presented by: Impact Ministries in partnership with Berwick Vineyard Church and St Matthews Community Church. **Enquiries:** 9708-0718
